

APEC Cooperative Network for Low Carbon & Energy Efficient Cities Invitation Letter

Dear APEC EWG Representatives,

APEC Sustainable Energy Center(APSEC)was established at the 11th APEC Energy Ministerial Meeting in 2014, which also written into the 22nd APEC Leaders' Declaration. It is a major achievement of the Chinese government responding positively to the initiative of APEC leaders to participate in energy cooperation in APEC region.

APEC Cooperative Network of Sustainable Cities(CNSC) is an important part of the Asia-Pacific Urbanization Partnership Initiative, adopted at the 2014 Leaders' Summit, and APSEC was identified as the official implementation agency for the leadership initiative. The CNSC program was formally established at the 51st APEC Energy Working Group (EWG) Meeting in Canberra, Australia.

Taking cities as the carrier, CNSC aims to realize the low-carbon energy transformation by energy technologies transfer and application. At present, APEC Cooperative Network for Low Carbon & Energy Efficient Cities and APEC Sustainable City Service Network were established. There are 8 cities from 3 economies and 11 enterprises from 4 economies joined the network respectively. The APEC Workshop on Sustainable Cities, as the flagship event of CNSC program will be held by APSEC and co-organized by the host economy on the margin of the APEC EWG Meeting in the first half of each year. It has been successfully held during EWG51 in Canberra, Australia; EWG53 in Singapore and EWG55 in Hong Kong, China.

Now, we sincerely invite you to recommend cities in your economy concentrated on sustainable cities to join the network, to reduce energy use and carbon emissions in cities, to promote cities sustainable development, and to seek a low-carbon, green, healthy and livable development path for cities.
